

350kW Cyprus Outdoor Energy Storage Unit for Power Grid Distribution Substations

In a move set to transform the country's energy landscape, the Cyprus Energy Regulatory Authority (CERA) has greenlit the development of three state-owned battery storage projects.

The storage facilities will allow the Operator to store energy from domestic or commercial photovoltaic and wind systems, using it during electricity shortages or for system stabilisation, ...

The Cyprus Energy Regulatory Authority (CERA) has approved the Cyprus Transmission System Operator's (TSOC) request to develop and operate large-scale energy storage systems ...

The Electricity Authority of Cyprus seeks contractors for EUR14.5 million construction works to install battery storage systems at substations in Nicosia, Larnaca and Paphos.

Supporting off-grid and grid use, it cuts energy costs, boosts efficiency, and ensures reliable backup power for industrial and commercial sites. Designed with a high discharge rate for ...

Cyprus will establish its first large-scale electricity storage infrastructure within the next 16 months, Energy Minister George Papanastasiou announced at the Green Agenda Cyprus Summit ...

The government of Cyprus has published guidelines for a scheme to support the deployment of approximately 150MW/350MWh of energy storage.

This project is sourced with publicly available data published by the Cyprus Energy Regulatory Authority (CERA), the Distribution System Operator (DSO) and the Transmission System Operator (TSO) of ...

The Electricity Authority of Cyprus (EAC) has issued a tender for construction and infrastructure works to install electricity storage systems at three substations in Nicosia, Larnaca, and ...
