

A 24-megawatt peak (MWp) capacity solar farm at Vienna Airport, an asset in our Global Infrastructure portfolio, is a significant renewable energy project. Online since May 2022, the facility ...

The top five players, Wien Energie, Verbund AG, EVN, Burgenland Energie, and KPV Solar, captured 35-40% of capacity ...

It's all courtesy of the sun: The Vienna Solar Power Campaign creates a fundamental framework for the expansion of photovoltaics and has boosted photovoltaic installations and output beyond all ...

Our solar power plant in Vienna's Liesing provides the optimum environment in the city for species requiring protection. Our citizen solar power plants allow people to financially participate in PV ...

PV generation has yet to be widely deployed in the CEE despite the ideal conditions with high levels of irradiation and availability of suitable land. Enery is a Vienna-headquartered renewable energy ...

With its solar power offensive (Wiener Sonnenstrom-Offensive), the City of Vienna has taken an important step towards optimal use of the potential in its urban areas.

Austria aims to achieve a 100% renewable electricity production by 2030 with 1,000,000 homes having solar panels fitted by that date. 11 TWh of extra photovoltaics will be needed above 2021 levels.

The plans for what the initiators claim will be the largest inner-city photovoltaic system to date were presented in Vienna on Monday. It will be ...

Learn more about how many units generated by 3kW solar panel and the factors influencing solar energy output.

If you can adjust the tilt angle of your solar PV panels, please refer to the seasonal tilt angles below for optimal solar energy production in Vienna, Austria.

Vienna has implemented its photovoltaic initiative in record time: The target of 250 megawatt peak (MWp) solar power capacity was reached ten months earlier than planned.
