

Afghanistan Green Solar Water Pump Inverter Retrofit

The number of farmers benefitted from irrigation water access through pumps powered by solar panels. Improved irrigation water services refer to improved access to surface water for irrigation purpose ...

Solar powered water pump technology is a very good solution to agricultural irrigation. The system consists of 4.8kW solar array, 5.5kW pump inverter and 5.5kw pump and provides 10m³/h water for ...

In December 2022, in Nimroz, Afghanistan, funded by UNICEF, the solar powered residential water supply project is officially accepted and handed over to the local government for management and ...

Solar Water Pump system consists of four parts: the actual pump which moves the water, the controller which adjusts the pump speed and output power more info

The project aims to benefit approximately 70 families in the surrounding area who rely on this well for their daily water needs. The Solar Well Project is a modern and environmentally friendly solution that ...

Zularistan started operations in Afghanistan in partnership with a German-based solar company. The German company operates in different parts of the world as distributor of pv products and supplying ...

By assessing the feasibility of PV-RO systems in rural Afghanistan, this study provides insights into the potency of these technologies to contribute to sustainable water solutions in similar settings.

FAO Aquastat, 2020 suggests that the total renewable groundwater (BCM/year) in Afghanistan is 10.65. Survey data suggests the number of solar powered groundwater wells, well in excess of 300,000 ...

SOCON solar water pump inverter solves the problem of water pump irrigation very well. It uses solar energy to operate automatically during the day, reducing the cost of using the power grid.

SOCON and SunSolar's solar water pumping system achieves new success in Afghanistan! The project is running smoothly and providing users with stable and reliable water supply services.
