

It is the leading company of the LS Group, a South Korean chaebol founded in 1962 - which holds diversified business portfolios encompassing cables, batteries, petrochemicals, and electronic ...

The company is a leading manufacturer of advanced electronic components, including capacitors, resistors, and sensors, serving various industries such as automotive, telecommunications, and consumer ...

This article presents a comprehensive list of global capacitor manufacturers, covering market leaders, regional players, and specialized brands, along with their product strengths and areas of focus.

A capacitor is a passive device on a circuit board that stores electrical energy in an electric field by virtue of accumulating electric charges on two close surfaces insulated from each other. This is a list of known capacitor manufacturers, their headquarters country of origin, and year founded. The oldest capacitor companies were founded over 100 years ago. Most older companies were founded during the AM radio era, which includes the World War II era and post war era. As the demand for advanced electronics con...

Supercapacitors or ultracapacitors offer unique advantages like ultrafast charging, reliable operation spanning millions of duty cycles alongside wide operating temperatures and collaborative integration with batteries or ...

The region is home to companies such as Maxwell Technologies (a Tesla subsidiary), CAP-XX, Saft, and Supreme Power, which are focused on supplying advanced super capacitor modules for electric ...

This is a list of known capacitor manufacturers, their headquarters country of origin, and year founded. The oldest capacitor companies were founded over 100 years ago. Most older companies were founded during ...

As a pioneer in manufacturing supercapacitors, its products range from coin, winding, and combined-type supercapacitors to module and high-temperature supercaps and hybrid capacitors. It caters to car, ...

Here, we explore the top 7 supercapacitor manufacturers that are at the forefront of this technology, driving innovation and sustainability. 1. Maxwell Technologies (A Part of Tesla Inc.) Maxwell ...

Their product lineup includes cylindrical cells, high-power-density supercapacitor, electric double-layer capacitors, field-effect transistors, digital storage oscilloscopes, lithium iron sulfate batteries, and more.

Founded in 1944 and headquartered in Kyoto, Japan, Murata Manufacturing Co., Ltd specializes in electronic components including capacitors, sensors and power supply modules counting among the world's largest ...
