

IPS reports that more than 70% of its supply chain is based in Europe, encompassing distributed liquid cooling systems, mechanical structures and housings, electronics and control units, ...

A new high-tech factory for the production of battery energy storage systems of International Power Supply (IPS) was opened on Friday in the Hemus Industrial Park in Sofia, the ...

IPS manufactures advanced power electronics, such as inverters, power conversion systems and battery chargers, and provides industrial power supply and microgrids solutions for ...

On June 2, it was reported that International Power Supply (IPS) is set to begin operations at its new battery energy storage systems (BESS) manufacturing facility near Sofia, Bulgaria.

From battery modules and packs to distributed liquid cooling systems, mechanical structures, enclosures, electronics, battery management systems (BMS), control units, and inverters ...

The facility will enable automated production of battery modules and packs, in-house manufacturing of battery management systems, liquid cooling systems and inverters, and will house ...

IPS, headquartered in Sofia, is automating and scaling its production of battery energy storage systems (BESS). It is counting on growing demand in Europe, including the domestic market.

The batteries will be manufactured in the high-tech Hemus Industrial Park, located in the Kremikovtsi district of Sofia. The plant is expected to open this fall, which will accelerate the ...

IPS has officially opened its new battery energy storage system (BESS) manufacturing facility near Sofia, Bulgaria - a site recognized by the European Commission as a Strategic Project ...

The new facility will feature automated production of battery modules and packs, in-house manufacturing of battery management systems (BMS), liquid cooling systems, and inverters. ...
