

Taking advantage of a new federal tax credit, BMC is the first hospital in the country to use solar panels to generate energy credits to help pay their patients' utility bills.

As of now, roughly 65 patients take part in the program, and can participate for a 12-month period. It's all made possible by BMC's 356-kilowatt solar array, which consists of 519 solar ...

For details, please consult SERAPHIM.

Made by Seraphim, the 670-watt SRP-670-BMC-BG is the most powerful solar panel on the market at the moment. However, this record-breaking panel is likely to be surpassed in the near ...

The program, made possible by the recent installation of solar panels on BMC's rooftop, will support the physical, economic, and environmental health of BMC patients and bring eligible low-income ...

Seraphim redefined the high-efficiency module series by integrating 210mm silicon wafers with multi-busbar and half-cut cell technologies. Seraphim panel combined creative technology effectively and ...

Detailed profile including pictures, certification details and manufacturer PDF.

Founded in 2016, SEG is a leading vertically integrated PV manufacturer headquartered in Houston, Texas, U.S., and is dedicated to delivering reliable and cost-effective solar modules to ...

Isc Temperature Coefficient +0.04 %/°C STC: Irradiance 1000 W/m² module temperature 25°C AM=1.5 Power measurement tolerance: +/-3% Rear Side Power Gain(SRP-660-BMC-BG)

Taking advantage of a new federal tax credit, BMC is the first ...
