

Easy-to-use solar temperature control system

Use as timer and differential control on 12V and 220V pumped solar system. Clear display of water temperature, time, day, heating mode and malfunction conditions on solar system and geysers.

Just set the digital thermostat and SolarTouch will monitor the temperature of the pool water and solar collectors. SolarTouch also integrates with IntelliFlo and IntelliPro Variable Speed Pumps, so you ...

Learn how to implement solar energy solutions for heating and cooling, and discover the benefits of a sustainable temperature control system.

EASY INSTALLATION: Simple plug-and-play design allows quick and effortless installation between your Amtrak Solar attic fan and solar panel wires. No complicated tools or adjustments ...

Effective solar heat depends on the solar and water temperature and the start and stop differentials, then SolarTouch's Controller will rotate the positive 3-way valve and turn on the solar booster pump or ...

You'll learn how to integrate your solar system with smart home devices, set up automated energy management, and leverage data insights to optimize your solar investment.

User-Friendly: Easy to use and understand, this solar controller makes understanding and monitoring the solar thermal system easy for both seasoned installers and new homeowners alike.

In addition to photovoltaic systems, solar thermal technologies offer a compelling method to control temperature. These systems focus on capturing and utilizing the heat from sunlight rather ...

It uses room sensors to control temperature in different parts of your home. It also connects with your solar panels to show your energy use and production, helping you make smart ...

While traditional methods such as greenhouses, cold frames, and regular watering help maintain ideal conditions, innovative solutions like solar heat collectors offer an eco-friendly and cost ...
