

# Egypt solar power generation distribution map

Why is solar energy important for Egypt?

Egypt has a serious amount of solar energy potential. Its exploitation is critical for a national sustainable development through efficient energy planning and gradual independence from fossil fuels.

Does Egypt have a country Factsheet?

Specifically for Egypt, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.

What is the Global Solar Atlas?

The Global Solar Atlas provides a summary of solar power potential and solar resources globally.

What data formats are provided in the study solar resource?

Download country factsheets, tabular data and the Study Solar resource (GHI, DNI, DIF, GTI, OPTA), PV power potential (PVOUT) and other parameters are provided in the form of raster (gridded) data in two formats: GeoTIFF and AAIGRID (Esri ASCII Grid). Provided data layers are in a geographic spatial reference (EPSG:4326).

The wind atlas of Egypt indicates that the country enjoys high wind energy potential, with wind speeds ranging approximately between 3.5 and 9.0 m/s in some areas (Figure 4). ...

The Solar Atlas of the Arab Republic of Egypt was issued in March 2018, containing data and averages of solar readings of up to 15 years, between the annual and monthly years, in addition to a dedicated ...

Data and information about Solar power plants and their location plotted on an interactive map of Egypt.

The Solar Energy Nowcasting System produces operational maps of Egypt at high resolution (1nm, 0.05 x 0.05 degrees, 15 min) and is based on the synergy of Neural Networks, ...

Of Southern and Eastern Africa Renewable Energy Zones (SEAREZs) This interactive PDF map contains locations of high quality wind, solar photovoltaic (PV), and concentrated solar ...

What percentage of solar PV installations are in Egypt? Solar PV capacity accounted for 13.0% of total power plant installations globally in 2022, according to GlobalData, with total recorded solar PV ...

The largest collection of free solar radiation maps. Download maps of GHI, DNI, and PV output power potential for various countries, continents and regions.

Egypt is at a development stage in the building and production of solar energy facilities. At end of 2024, the total capacity of installed photovoltaic systems were about 2 570 MW.
