

The Trisolar project aims to transform the way we think about transportation by harnessing the power of the sun to fuel tricycles. This is a ground-breaking sustainable energy initiative aimed at ...

The process of developing an electric tricycle with solar power consists of several stages, starting from the preparation of the tricycle, the development design, the manufacture of the solar ...

Durable, sustainable, and beautiful custom electric trikes for on-street vending, outreach, and deliveries.

Discover solar tricycles with EEC certification, 50-70km range & brushless motor. Ideal for passenger transport or cargo use.

A solar-powered electric tricycle is a three-wheeled vehicle that utilizes solar energy to power its electric motor. These tricycles are equipped with solar panels that convert sunlight into electricity, which is ...

Discover how solar-powered electric trikes work, their pros and cons, and whether they are a practical green option for everyday urban and off-grid travel.

Ever wondered how delivery fleets could slash fuel costs while meeting zero-emission targets? Electric tricycles equipped with photovoltaic (PV) panels are quietly transforming last-mile ...

One of our signature innovations includes our solar-powered foldable electric tricycles, designed to provide eco-friendly and self-sustaining travel, especially in remote or off-grid areas.

Discover what to look for in a solar powered tricycle, from performance and design to price and safety. Make an informed decision with this expert guide.

We have been working on tricycles for years & specialize in the fields of mechatronics, fiberglass & aluminum fabrication. We just need to build a few functioning prototypes to show the ...
