

U.S. patent number 10,673,374 [Application Number 16/359,683] was granted by the patent office on 2020-06-02 for solar panel module mounting bracket. This patent grant is currently assigned to Unirac Inc.. The grantee ...

The flexible photovoltaic tracking bracket can prevent the photovoltaic modules from being twisted under the action of positive pressure, and overcome eccentric torque caused by deadweight eccentricity of ...

As a revolutionary invention in the field of photovoltaic brackets, the flexible photovoltaic bracket can promote rapid development in photovoltaic power generation.

This application belongs to the field of photovoltaic technology, and in particular relates to a flexible photovoltaic bracket and a flexible photovoltaic system.

The utility model provides a flexible photovoltaic bracket, which is used to solve the technical problem that the existing connection nodes usually adopt two clips, and the cable rod is...

In these photovoltaic installation scenarios, ordinary rigid beam supports need to adapt to complex environments, which are expensive and difficult to construct.

The utility model aims to provide a flexible photovoltaic bracket and aims to solve the problem that in the prior art, a photovoltaic plate on a guy cable cannot be subjected to angle...

The invention relates to the technical field of brackets, in particular to a flexible photovoltaic bracket suitable for complex terrains.

The present application relates to the technical field of photovoltaic brackets, and discloses a flexible photovoltaic bracket and a photovoltaic array.

An object of the present disclosure is to provide a flexible photovoltaic bracket, which has beneficial effects of being easy to install, stable and reliable, and avoiding tearing of a photovoltaic module.
