

In Chaideng Village in Ordos City, Inner Mongolia Autonomous Region, 3.46 million blue solar panels are spread across the desert, covering 30 square kilometers and transforming the ...

As part of this initiative, it has now converted a former coal mining site into its largest single-capacity solar power plant. The Mengxi Blue Ocean Photovoltaic Power Station covers an area...

NASA has published a new series of pictures of the Great Solar Wall, a giant cluster of PV power projects in Inner Mongolia's Kubuqi Desert.

Deep in the Kubuqi desert in north China's Inner Mongolia Autonomous Region, rows of blue solar panels glisten under the winter sun, converting sunlight into electricity that flows into ...

As part of its long-term plan to create a "solar Great Wall," China is pressing ahead with a giant renewable energy project to electrify Beijing and reverse desertification.

The Junma solar power station -- "Junma" meaning "fine horse" in Chinese -- is part of an ambitious desert reclamation project known as the "great photovoltaic wall," stretching ...

The quick summary: China is building a massive 400-kilometer solar array in the Kubuqi Desert, dubbed the "Solar Great Wall," which will generate enough power to supply major cities like ...

China launches the Great Solar Wall in Inner Mongolia, a project that combines power generation and desert conservation, with environmental and economic impact.

China has made a revolutionary breakthrough in renewable energy engineering after it just launched the world's first solar-thermal power plant that utilizes a dual-tower system to generate...

Startup energy venture company SolarReserve (created via seed funding), US Renewables Group, and United Technologies were the original owners of Tonopah Solar Energy LLC, the owner and operator ...
