

Its UNIQUE product portfolio ranging from the OEM manufacturing of cells and modules, design, construction, operation and maintenance of solar photovoltaic plants.

By directly interfacing with upstream sectors such as renewable power generation and hydrogen production via water electrolysis, the collaboration will establish low-carbon hydrogen ...

China Coal Green Energy will invest in and construct the renewable power and hydrogen generation systems. The subsidiary was established by the state-owned National Coal Group to "support the ...

GUOFU PV Technology stands at the forefront of the solar energy revolution, particularly excelling in the advanced manufacturing of solar PV wafers, cells, panels, and utility systems.

On October 14, 2025, Guofu Hydrogen Energy and China Coal Green Energy reached a strategic cooperation regarding the integrated wind and solar power to hydrogen project in Ulanqab, Inner ...

Chinese electrolyser manufacturer Guofu Hydrogen Energy Equipment (also known as Guofu HEE or Guofuhe) has signed a framework agreement with a large state-owned mining ...

This project uses abundant solar energy by utilizing rooftop PV power generation to provide clean energy for hydrogen production equipment. Its primary off-grid operation is ...

Chinese electrolyser manufacturer Guofu Hydrogen Energy Equipment, also known as Guofu HEE or Guofuhe, has entered into a framework agreement with China Coal Green Energy, a ...

It is exclusively responsible for investing in and constructing wind-solar power generation systems and green power hydrogen production systems, providing stable green electricity support for projects.
