

IGDI specializes in the development of microgrids that optimize the transmission of gaseous energy, making it a key player in the energy transition. Their focus on efficient gas transportation solutions ...

In Hurungwe, about 270 kilometres from the capital Harare, a 120kW solar mini-grid has been constructed. Villagers in the Hakatwa community pay a small fee to access electricity.

With GEF funding, the United Nations Development Programme will be implementing the program together with Rocky Mountain Institute (RMI) and the African Development Bank (AfDB), linking up ...

A new smart microgrid at the 68 Ridgeway North shopping center in Harare is really a game-changer for the tenants in the complex. Charles Pickering was born in Kadoma, ...

The U.S. embassy compound in Harare is a multi-building campus that receives intermittent power from the local utility due to the utility's limited generation capacity. The local utility shuts down power to the ...

Harare, and Zimbabwe, has been starved of new commercial and retail developments over the last few decades due to several economic issues, but there is now some activity in this sector with...

Five potential minigrid sites have been identified as part of the United Nations Development Program's \$1.5 million Energy Offer Project. Zimbabwe has long embraced minigrids as a way to combat ...

The U.S. embassy compound in Harare is a multi-building campus that receives intermittent power from the local utility due to the utility's limited generation capacity.

This project, valued at nearly US\$2 million, is part of a larger initiative to promote sustainable development in rural areas. The project has already had a positive impact on local ...
