

Harbin Asia Power Engineering EPC Team ensures the completion of each solar plant from concept to commissioning including its operation and maintenance for the complete lifespan of the plant.

In August 2021, Harvey Solar applied to build a solar farm in Hartford and Bennington Townships in Licking County that would generate up to 350 megawatts.

A ruling by the Ohio Supreme Court has cleared the 350 MW Harvey Solar Project, affirming the 2022 Ohio Power Siting Board decision for Leeward Renewable Energy.

Developed by Open Road Renewables, Harvey Solar will be located in Hartford and Bennington Townships of Licking County with an 18-24 month construction phase anticipated to begin in 2024.

LRE subsidiary Harvey Solar, LLC is proposing the development of a renewable energy facility with up to 400 megawatts (MW) of solar power generation and 100 MW of battery energy storage.

Harvey Solar touts the benefits of its project in meeting Ohio's "growing need for power generation," creating construction jobs, and providing additional tax revenues for local communities.

Harvey Solar estimated the solar farm will bring \$161 million in spending to the area, generate 1,092 full-time jobs and produce \$3.3 million annually in additional taxes along with other...

The proposed Harvey Solar Project is a solar-powered electric generation facility proposed in Bennington and Hartford Townships, Licking County. The facility will be sited on approximately 2,630 ...

Focusing on developing strategic emerging industries, Harbin Electric Corporation has long been committed to the research, development, and innovation of solar thermal power ...
