

With a total investment of about 15.2 billion yuan, the project plans to build an annual 36GWh lithium-ion battery project, which will start construction in the first quarter of 2022.

The company manufactures lithium-ion batteries for energy storage applications, catering to various industries and contributing to the efficient management of renewable energy.

Founded in 1997, Lishen is one of China's earliest lithium-ion battery manufacturers. Its total capacity across China has now reached over 31 GWh, with production bases in Tianjin, Qingdao, Suzhou, ...

Lishen Battery, China's first lithium-ion battery R&D firm and manufacturer, has nearly 26 years experience of the same. The annual production capacity of 31GWh lithium-ion battery enables Lishen ...

As a state-owned holding national high-tech enterprise, Lishen Battery has become a leading enterprise in the professional production of domestic lithium-ion batteries after years of ...

LISHEN is a leading lithium battery manufacturer and supplier for EV power and energy storage solutions.

This city boasts a cluster of high-tech companies specializing in advanced lithium battery systems and EV lithium battery manufacturers, making it a pivotal area for solar battery manufacturers in China.

We compare offers from lithium-ion battery factories based on production capacity, specifications, and timelines. Transparent communication with suppliers helps us secure the best pricing structure.

Information on valuation, funding, cap tables, investors, and executives for Lishen Battery.

LISHEN, headquartered in Tianjin, China, is a state-backed leader in lithium-ion battery innovation. The company advances sodium-ion and semi-solid cell technologies, powering EVs, consumer ...
