

"China's largest" integrated offshore photovoltaic (PV) demonstration project, combining solar power, hydrogen production and refueling, and energy storage, has been connected to the grid ...

Hengtong is proud to contribute to China's largest integrated offshore photovoltaic demonstration project featuring solar power, hydrogen production and refueling, and energy storage, ...

Zhangjiakou is a national wind and solar energy storage and transmission demonstration project zone, and it aims to become an international hydrogen city by 2035.

Hengtong Group announced today, on January 7, 2025, that this development marks the launch of "China's first" PV project aimed at ecological remediation of tidal flats. The project ...

By leveraging coastal tidal flat resources and employing advanced PV technologies and intelligent control systems, the project maximizes energy conversion and storage efficiency. ...

Designed with a capacity of 605,000 kilowatts, the project is the largest single energy storage power station under construction in the country. The energy storage station can help send a ...

Recently, Qinghai Company's Hainan Base under CHINA Energy in Gonghe County has successfully connected the fourth phase of its 1 million kilowatt "Photovoltaic-Pastoral Storage" project and the ...

The facility is the world's largest project to combine wind and solar power with energy storage and smart transmission. By the end of May 2024, the base had generated 12 billion kilowatt ...

Located along the coast of Jiangsu Province in China, this project combines fishery farming and PV power generation, with a PV capacity of 120MW and a 20MWh energy storage system.
