

# How big is the cable for 28 photovoltaic panels

What size solar cable do I Need?

The size of solar cable you need depends on the length of the cable and the power of each solar module. Below is the minimum recommended cable size (in cross-section area of a two-core cable) for 24V panels with a voltage loss of less than 5%.

What is solar cable size selection?

Solar cable size selection is an important aspect of designing a photovoltaic system. These cables, which are composed of multiple insulated wires enclosed within a protective outer jacket, are used to connect various components of a solar system.

How to choose a solar panel cable?

The power producing capacity of your solar panel. The bigger the electric power created, the bigger the size of the PV cable should be. The distance of the PV panel to components and the loads. The farther the distance, the bigger the size of the solar cable to use.
