

How long does it take to install a photovoltaic panel

How long does it take to install solar panels?

This step usually takes around 1-2 weeks. After the assessment, the installer designs a solar panel system customized for your home. This includes determining the best type and location of solar panels. On average, this design process takes about 1-2 weeks. Your installer will also help you apply for permits from your local authority.

How long does it take to get rooftop solar panels?

If you've decided to get rooftop solar panels, be patient -- it'll take a few months before you see those savings in your electric bill. Installing solar isn't as a quick-turnaround project as you might expect.

Why do solar panels take so long to install?

One significant factor that can lead to delays in solar panel installation is adverse weather conditions. Inclement weather such as heavy rain, snow, or storms can make it unsafe for installation teams to work on rooftops. In such cases, the installation may need to be rescheduled, causing delays in the overall timeline.
