

Featuring a 400MW solar PV system coupled with a 1.3GWh energy storage system, this ambitious project is set to revolutionize sustainable energy solutions in hospitality.

In addition to the six projects that reached financial commitment, a further three battery storage projects commenced construction in the first quarter of 2025, with a total of 840 MW / 2.9 ...

The agreement targets a significant 700 MWp project pipeline across APAC countries. This collaboration signals a major step forward in the region's clean energy ambitions, combining ...

Huawei launched its home battery, the LUNA2000 energy storage system, at the Smart Energy Conference in Sydney last week.

Finnish energy giant W&#228;rtsil&#228;; has announced the latest addition to its massive network utility-scale battery energy storage system (BESS) projects in Australia: a record

The newly completed 12MWh energy storage project, which was developed in collaboration with SchneiTec, a renewable energy developer, features a 2MWh testbed designed to validate Huawei's ...

Huawei Digital Power has said it will supply battery energy storage system (BESS) technology to what is thought to be the world's largest off-grid energy storage project to date.

Huawei has won the contract for the world's largest energy storage project, the company said on Monday.

Listed below are the five largest energy storage projects by capacity in Australia, according to GlobalData's power database. GlobalData uses proprietary data and analytics to ...

"Proposed" include those still working through initial processes. See also our maps of solar farms, wind farms, offshore wind projects, and pumped hydro projects.
