

Hungary is aiming to support the installation of at least 800MW/1,600MWh of new energy storage projects through the scheme. The projects will help to integrate new renewable energy ...

Hungarian authorities launched the tender for grid-scale batteries on January 15 and received offers until February 5. The winning bidders were selected a few days ago. They are set to ...

Last Thursday, the government said that it has selected the winning bidders and allocated HUF 62 billion for their energy storage projects. The selected companies and organizations ...

The scheme aims at enhancing the flexibility of the Hungarian electricity system by supporting storage investments to facilitate smooth integration of high capacity of variable renewable energy sources in ...

European Commission has approved a EUR1.1 billion worth Hungarian scheme to support the installation of at least 800 MW/ 1600 MWh of energy storage facilities to foster the country's ...

Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

They optimized a microgrid comprising wind turbine, PV unit, heat storage tanks, battery storage, CHP, and electric boilers, analyzing the impact of energy storage systems and demand response.

Considering current market trends and the availability of technologies and their support services in Hungary, the Hungarian authorities expect that the majority of the proposals will be battery storage ...

We follow the development of the domestic storage market and actively shape its future. We welcome as members all stakeholders who wish to learn about the Hungarian and regional energy storage ...

As part of the IElectrix project, Hungary installed two grid-connected battery energy storage systems (BESS) at Z&#225;nka and D&#250;zs, the first such systems owned and operated by a Hungarian DSO. A ...
