

# Hybrid procurement contract for photovoltaic and energy storage cabinet

Are hybrid PPAs a viable solution to co-location?

PPAs |The co-location of renewable generation and energy storage demands new contractual arrangements to make such projects commercially viable. Jack Rankin, Miguel Valderrama and Brian Knowles of Pexapark explore how hybrid PPAs are becoming a favoured solution for structuring deals that capture the full value of both assets

Are hybrid PPAs a 'co-located' asset?

Jack Rankin, Miguel Valderrama and Brian Knowles of Pexapark explore how hybrid PPAs are becoming a favoured solution for structuring deals that capture the full value of both assets In the world of power infrastructure, we may broadly define "co-located" assets as those that share a single connection to the grid.

Will hybrid PPA contracting continue to grow?

In conclusion, we expect that gradually more and more markets will continue to devise mechanisms to stimulate flexibility additions, as this is indispensable in grids with a growing share of intermittent renewables; this in turn will favour the deployment of storage co-location, leading also to a growth in hybrid PPA contracting.

What is a hybrid PPA?

With a hybrid PPA, the idea is to get the best of the two worlds: potentially generate revenues through grid services, while improving the investment returns of the renewable asset. The first financial-benefits touchpoint of considering co-locating a renewable asset with storage is the cost savings from the shared grid connection.

In the context of decarbonization, the focus of central procurement in hybrid electricity markets has broadened beyond renewables to include electricity storage. Our analysis suggests that ...

Electricity storage serves as an important facilitation resource for decarbonization. Battery energy storage systems (BESSs), for example, provide multiple functions including system ...

Power purchase agreement (PPA): A contract allowing the customer to avoid making upfront capital investments for the project and operating responsibilities. A PPA uses third-party ...

The co-location of renewable generation and energy storage demands new contractual arrangements to make such projects commercially viable. Jack Rankin, Miguel Valderrama and Brian ...

Abstract Challenges to the term financing of standalone storage in energy-only electricity markets relate to the difficulty of obtaining long-tenor contracts given multiple volatile revenue ...

We discuss these in more detail in New Tax Credits and Monetization Opportunities for Energy Storage Have the Chance to Revolutionize the Industry. Changes in Law: Energy storage ...

# Hybrid procurement contract for photovoltaic and energy storage cabinet

Work on a solar energy and battery storage project in Senegal, touted to be the biggest in West Africa once it goes live, is set to begin next month after an EPC (Engineering, Procurement and ...

**BUSINESS MODE** Model-I: Two-part contract for PV and BESS Two separate contracts for power generation by the Solar PV Panels and available capacity by the BESS. Model-2: Fully ...
