

"Green Future, Net Zero" aren't just fancy words but reflect India's need and commitment, making it the best destination for investment and innovation in renewable energy.1

By the end of 2025, India's solar power installed capacity reached 135.81 GW AC. [1] India is one of the world's fastest adopters of solar power, making it the third-largest producer of solar power globally as ...

India added 11.3 GW of solar capacity in Q2 2025 compared to around 6.8 GW in Q1 2025, marking a 66.9% quarter-over-quarter increase. The surge was largely driven by policy-linked ...

Explore the top 10 solar power plants in India (2026), installed capacity, upcoming projects, and the growing role of battery energy storage systems.

India has the world's third-largest installed solar capacity and plans to reach 280 GW by 2030. This is supported by favourable government policies that capitalise on the country's geographic and ...

Solar Power\* (Cumulative) : 135.81 GW. ^Large Hydro includes 7175.6 MW Pumped Storage. # Excluding Nuclear Capacity of 100 MW, which is under outage for very long time, and ...

The study estimates India's total solar potential at 10,830 gigawatts (GW), far exceeding previous assessments while identifying new opportunities across both conventional and innovative ...

Indeed, in 2023, India was the third-largest solar energy producer in the world, adding over 16.6 GW of new solar installations. This growth is driven by ambitious government targets,...

India has declared an ambitious target of 500 GW of renewable energy (RE) by 2030, comprising around 280-300 GW of solar energy alone. As India graduates from 100 GW to triple its ...

Solar additions in calendar year 2025 comprised 28.6 GW of new utility-scale solar capacity, 7.9 GW of rooftop PV power, and 1.35 GW of off-grid and distributed installations.
