

# Intelligent Folding Container for Airports in Ljubljana

SKLADIX Industries is revolutionising the response to current challenges in air cargo handling with the introduction of intelligent automated guided vehicles (AGV) for flexible and scalable ULD transportation.

The Aircargo Centre includes over 4,000 m<sup>2</sup> of covered storage area containing modern equipment for handling air cargo, aircraft loading and unloading and ramps for loading and unloading road vehicles. ...

Empty runs and limited space are no longer obstacles when 5 folded CN Cargo units can be stored and transported in the space of 1 standard container.

Logistics firm cargo-partner has officially opened its expanded logistics facility close to Slovenia's Ljubljana Airport and announced a Sustainable Aviation Fuel (SAF) project.

The expansion of the facility, which was originally planned for 2024-2026, has now been pushed forward to 2022. The expansion will bring the area of the iLogistics Center Ljubljana to a total ...

In addition to the increase in storage capacity near Ljubljana Airport, the company's latest investments include new logistics centers in Zagreb and Istanbul as well as capacity expansions in China.

By bypassing the need to transport empty containers to a dedicated folding facility and instead folding and bundling them on-site, SKLADIX achieves significant cost savings.

Our AI-powered automation system allows for seamless loading and unloading of cargo without traditional containers. This not only accelerates turnaround times but also significantly reduces ...

In 2019, cargo-partner opened its logistics complex in the immediate vicinity of Ljubljana Airport, one of the largest in the cargo-partner group and in the region.
