What is the New Energy Outlook?

The New Energy Outlook presents BloombergNEF's long-term energy and climate scenarios for the transition to a low-carbon economy. Anchored in real-world sector and country transitions, it provides an independent set of credible scenarios covering electricity, industry, buildings and transport, and the key drivers shaping these sectors until 2050.

How do energy investments work?

Investments are targeting new builds based on existing energy sources (natural gas and renewables) and new ones (nuclear and geothermal), augmenting and optimizing existing energy infrastructure, and converting existing assets into those capable of powering data centers (such as converting a coal plant to a gas plant).

What is a strategic buildout for a natural gas storage energy leader?

Strategic buildouts for a natural gas storage energy leader. A chance to reflect on our company's engagement, listening and learning over the past two years. We've announced another US\$0.5 billion in gas transmission projects. Enbridge employees raise US\$4.3M (C\$5.9M) across North America.

How much investment is needed for new and improved infrastructure?

According to McKinsey estimates, addressing the global need for new and improved infrastructure will require roughly \$106 trillion investment across the seven main verticals by 2040 (Exhibit 3; see sidebar "About the research" for our methodology).
