

Did you know Iraq faces 5GW power deficits during peak demand? With temperatures regularly hitting 50°C, the country's aging grid struggles to meet basic needs.

We have successfully installed, tested and energized a 100 KWp ground mounting Solar PV Hybrid Microgrid System at the UNAMI Compound, located in BIAP, Baghdad International Air Port-Iraq.

Let's be real: when you think of Iraq, solar panels and microgrids might not be the first things that come to mind. But guess what? The country is quietly becoming a hotspot for energy ...

Iraq is taking serious steps toward expanding solar power with efficient battery storage systems. The global decline in battery prices, coupled with foreign investment and government ...

Historical Data and Forecast of Iraq Microgrid Market Revenues & Volume By More than 10 MW for the Period 2020 - 2030 Iraq Microgrid Import Export Trade Statistics

This paper aims to explore the feasibility of hybrid mini-grid power systems for electrifying rural areas in Iraq. The focus is on identifying the most cost-effective and reliable system through size optimization ...

This research, presented a successful alternative, which applied all over the world, which is the local microgrid. Also, it's developed a design for this microgrid that suits the conditions of Iraq ...

Iraq faces significant challenges due to climate change, including escalating temperatures and decreased rainfall. These conditions exacerbate droughts, leading to migration from rural to ...

This article aims to provide a comprehensive review of control strategies for AC microgrids (MG) and presents a confidently designed hierarchical control approach divided into different levels.
