

By Scott Poulter The UK is known to be one of the world's most active markets for battery energy storage. In 2022, the market saw a record 800 MWh of new storage capacity being added. ...

This post investigates the state of the UK battery storage pipeline, year-to-date figures and an insight into the appetite to develop over time. Battery storage is essential for providing the ...

Operational UK grid-scale battery storage capacity grew 45% in 2025, with 4GWh coming online to reach 12.9GWh cumulative capacity.

Ørsted, a global leader in offshore wind energy, has marked breaking ground for its first large-scale UK battery energy storage system (BESS) with a golden shovel ceremony.

In the years ahead, the UK is expected to become the second most important market for large-scale battery energy storage in Europe. Now another major project is going online in ...

GB battery buildout hit 5.2 GW in Q1 2025. This report breaks down new projects, rising durations, and how portfolios are scaling across the market.

Discover the biggest commercial battery storage UK projects in 2025, including NatPower's Teesside GigaPark, Statera's Carrington, RES's Coalburn etc.

Explore how battery energy storage systems are transforming the UK's energy landscape, enabling cleaner, smarter, and more reliable power solutions.

On 2 December, RWE confirmed its largest UK battery energy storage facility at Pembroke in South Wales. It is a 350 MW, 700 MWh, two hour lithium ion system with 212 ...

Large-format battery storage for developers and EPC firms. Aster systems from 500kW to multi-megawatt scale.
