

Find solar research publications in the NLR publications database.

Solar energy has attracted global attention as a crucial renewable resource. This study conducted a bibliometric analysis based on publication metrics from the Web of Science database to ...

**Purpose of the Study** This study evaluates the potential benefits, challenges, and options for NASA to engage with growing global interest in space-based solar power (SBSP). Utilizing SBSP entails in ...

A historical perspective is provided, tracing PV technology from the discovery of the photovoltaic effect in 1839 to its latest innovations, such as high-efficiency cells, bifacial panels, solar ...

**Abstract-** The rapid evolution of solar photovoltaic (PV) technology has sparked a revolution in the global energy landscape, driving a transition towards renewable energy sources.

**Concentrating Solar Power Update** NREL is moving to 100-kW demonstration in an ARPA-E-funded 100-hour thermal energy storage project in sand. The technology has a 95% round-trip efficiency, ...

The present review study, through a detailed and systematic literature survey, summarizes the world solar energy status along with the published solar energy potential assessment articles for ...

It references recent published literature to present findings on energy payback time, carbon footprint, and performance metrics. Challenges to widespread adoption are discussed, ...

**A Comprehensive Review of Solar Photovoltaic Systems: Scope, Technologies, Applications, Progress, Challenges, and Recommendations** Published in: IEEE Access ( Volume: 13 )

**Solar-assisted tri-generation system with LCPV-CPC and small-scale gas turbine for year-round clean energy in hot-dry climates** Mohamed Bechir Ben Hamida, Rassol Hamed Rasheed ...
