

To ensure that the system is sized optimally, the project will aim to manage demand distribution during the day, and will aim to reduce the night time load, with a combination of smart metering and through ...

Lesotho is expanding energy access through a new mini-grid regulation that promotes private investment, strengthens rural electrification, and supports sustainable development across ...

The second phase of a pioneering solar mini-grids project in Lesotho is underway following the completion of a pilot project funded by REPP in Ha Makebe village, north-east of Maseru.

The move coincided with OnePower's successful bid to develop the first utility-scale solar project in Lesotho, a 20-megawatt project that will sell electricity to Lesotho's central grid in addition to ...

The project is being implemented through the Smart Villages Research Group, MOSCET (a local off-grid energy company), the National University of Lesotho and Gram Oorja, the Indian technical lead for ...

An estimated 20,000 people and seven health clinics will now be connected to clean energy for the first time through the project, which followed the successful completion of a REPP ...

The EU-funded ElectriFI, managed by EDFI Management Company (EDFI MC), today announced a new LSL 40 million investment in Sotho Minigrid Portfolio, a project company set up for ...

As of May 2022, OnePower is rolling out 10 mini-grids in Lesotho based on a structured and optimized schedule. Rather than looking at each minigrid in isolation, OnePower has bundled construction and ...

The goal of this technology aligns with Lesotho's plan to increase rural electricity access to 75% by 2038. The plan includes installing 160 MW of solar PV capacity and connecting households ...

This project is being carried out by SVRG's sister company, STI4D, in collaboration with local offgrid energy company MOSCET, the National University of Lesotho, and technical lead Gram ...
