

Discover high-quality lithium battery storage bags built to contain fires and explosions. Versatile solutions for all your battery needs.

The EnerC+ container is a modular integrated product with rechargeable lithium-ion batteries. It offers high energy density, long service life, and efficient energy release for over 2 hours.

Openex provides full-service metal fabrication for the lithium battery manufacturing industry, producing structural assemblies, enclosures, containers, and equipment frames for battery production lines.

The lithium ion battery packaging utilises standard footprints designed to interface with customers' existing supply chains. Once batteries are removed at the assembly line, two-unit loads can fit ...

KASSICO Battery boxes are designed for safe packaging and transport of lithium-ion batteries. There are comprised of seal airtight aluminum cases with fireproof explosionproof linings of materials that ...

We combine high energy density batteries, power conversion and control systems in an upgraded shipping container package. Lithium batteries are CATL brand, whose LFP chemistry packs 1 MWh ...

Our durable containers utilize precision-engineered compartments and impact-resistant materials to safeguard electric vehicle battery modules, providing a secure and resilient transport solution for ...

Americase designs each lithium battery storage container to perform under extreme conditions, providing unmatched thermal protection, shock resistance, and modular scalability.

As a specialist in reusable plastic packaging, we develop and produce innovative battery packaging for your Li-ion batteries - from standardized transport containers to individual load carriers.

When it comes to Lithium-Ion Battery Storage Cases, you can count on Grainger. Supplies and solutions for every industry, plus easy ordering, fast delivery and 24/7 customer support.
