

But here's the kicker: this Balkan nation is quietly becoming a hotspot for energy storage solutions. With increasing renewable energy adoption (think solar farms popping up like mushrooms after rain), the demand ...

A new energy law adopted in May 2025 is expected to further accelerate the uptake of battery storage. State-led solar and wind projects, along with investments in grid infrastructure and storage, are now ...

The Government of the Republic of North Macedonia has approved the award of a concession to a Greek consortium of national power utility PPC and construction group Archirodon for the design, financing, ...

North Macedonia's plan for 2026 includes 67 power plant projects of at least 1 MW each, for investments totaling an estimated EUR 3.74 billion, and 96 accepted proposals for standalone and co ...

China-based Cubenergy will provide the energy storage systems while YESS Power will manage all engineering, procurement, installation, and commissioning phases. This BESS project will be co-located ...

The ministry approved 67 power plant projects, for facilities of at least 1 MW each, on a first-come, first-served basis. Another section is for co-located energy storage systems and standalone ones of 1 MW ...

YESS Power, together with China-based Cubenergy and under the investment of Mey Energy, is building a 60 MW battery energy storage system (BESS) that will be fully integrated with the Balkans" ...

For North Macedonia to achieve its renewable targets, power lithium battery storage isn't optional - it's essential. From solar farms to industrial complexes, these systems provide the flexibility and reliability ...

A city where sudden power outages become as rare as unicorn sightings, and solar panels work overtime even after sunset. That's the promise of the Skopje Energy Storage Project - North Macedonia's ...
