

At an event in Madrid, the government presented its new Electricity Transmission Grid Planning strategy to 2030, outlining a sweeping EUR16 billion investment package designed to expand ...

The final results and resolution confirm financing for 133 storage projects with an aggregate power capacity of nearly 2,400 MW and a cumulative energy capacity of approximately ...

Nine projects combine storage with solar thermal power generation, while four more link both photovoltaics and wind power with storage technologies. In addition, 39 standalone battery ...

From stabilizing renewable grids to revolutionizing urban transport, supercapacitors at the Madrid Energy Storage Institute are redefining energy storage. With ongoing research and real-world ...

The selected projects range from large-scale battery systems to industrial thermal storage and new pumped-hydro plants, reflecting both the technological maturity of the sector and ...

Welcome to Madrid's energy landscape, where solar power and energy storage solutions are rewriting Europe's renewable playbook. With Spain aiming for 22.5GW of energy storage by ...

Altogether, the selected projects will add 2.2 GW of power output and 9.4 GWh of storage capacity. The renewable technologies paired with hybrid storage projects are mainly solar ...

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes ...

The Solarplaza Summit Energy Storage Spain, hosted in Madrid on the 24th of October 2024, will represent a prime opportunity to lead in the energy storage space, driven by favorable ...

The country aims to deploy 22 GW of energy storage by 2030 and 50 GW by 2050. Currently, the total installed capacity of energy storage in Spain--covering planned, under ...
