

This report features 26 microgrid case studies from California, North America, and other countries that make innovative business cases and rely on government support for less than 50 percent of project ...

This guide is meant to assist communities - from residents to energy experts to decision makers - in developing a conceptual microgrid design that meets site-specific energy resilience goals.

This report describes the technical assessment of a microgrid for three research buildings at the University of Colorado's East Research Campus in Boulder, Colorado, and provides several ...

This report captures and shares experiences and lessons from the Miramar assessment, conceptual design, solicitation, engineering design, and construction process as well as from other ...

The Net-Zero Microgrid Program provides cross-cutting research to accelerate the use of renewable and zero-carbon generation in microgrids.

This report provides a baseline to evaluate IRES project-specific needs and also attempts to inform general industry efforts for development of C&S to support the adoption and use of microgrid and ...

This report details how NCEMC implemented a microgrid project at Butler Farms. It intends to provide reference material for electric cooperatives interested in developing a microgrid on their systems, so ...

This report analyzes the microgrid market landscape across 21 states and territories, providing insights into regulatory frameworks, incentive programs, commercial opportunities, and strategic approaches ...

While DOE has made significant progress in supporting microgrid deployments, there remain research gaps for both remote microgrid, and microgrids for critical infrastructure, which are being addressed ...

The included items are intended for use in the development of a commercial-scale microgrid and help identify the key actions to be taken during the project planning, design, procurement, and ...
