

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no shading ...

The Lifos Roof Frame allows a solar array to be built on the ground and craned on to the roof of a cabin or container. Each frame holds 9 x 190W panels securely and comes complete with lifting harness.

MOSAMBI LTD - Free company information from Companies House including registered office address, filing history, accounts, annual return, officers, charges, business activity

Our products are engineered and manufactured in the UK, ready to generate and provide electrical power at the client's premises anywhere in the world. Access to a parts supply chain means that systems can be built ...

A containerized, movable off-grid solar power solution that unfolds into a high-capacity PV array in minutes. Designed for fast deployment, reliable output, and easy transportation to remote sites, farms, construction ...

As energy challenges grow, our solar container solution was created to meet the need. It provides clean, efficient power wherever you need it and can also generate profit. The container is equipped ...

Discover our range of innovative solar panels on shipping container products engineered to meet your renewable energy needs with maximum efficiency and reliability.

These offer a reliable and constant power supply, and thanks to increasingly advanced systems, noise and exhaust emissions are kept within limits. Only the highest quality components are used in the mobile PV ...

This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations.

We sell a container including fold-up aluminium solar wings, each made from 8 solar panels, providing 2.4kW power and wired to the pre-fitted technical room inside the container.
