Off-grid kits include solar panels, off-grid solar inverters, charge controllers, solar storage batteries, enclosures and mounting. Browse our selection of pole mounted kits, continuous power ready kits, generators, solar appliance kits, and solar ready battery systems.

What is an off-grid Solar System?

START SOLAR DESIGN Off-grid solar powered systems provide electricity to remote locations not connected to the utility grid. Off-grid kits include solar panels, off-grid solar inverters, charge controllers, solar storage batteries, enclosures and mounting.

How much power does an off-grid solar system need?

Typically, we recommend kits ranging from 60 to 720 watts for smaller homes, depending on how many devices and appliances need power. If you'd like further information in order to make the optimal decision regarding your off-grid small home solar system kit, you can contact one of our specialists who can guide you through the process.

How do I design an off-grid Solar System?

Designing an off-grid solar system can be complex. There are three factors to consider when sizing for off-grid solar: The most common off-grid system configurations range from 5kW to 21kW. However, energy usage varies for every household, so the best approach is to design a custom off-grid solar kit based on your specific energy usage patterns.
