

EES Europe 2026 will be held in Munich from June 23 to 25, 2026. It is the largest and most international battery and energy storage system exhibition in Europe, dedicated to showcasing ...

Utility-scale batteries are booming in Europe. Discover key BESS trends, market impacts, and what to expect for large-scale storage in 2026.

Imagine a world with seamless energy storage, where renewable sources power our cities, homes, and vehicles. We strive to be a distinctive lead supplier for the electrified automotive world and beyond, ...

The ees Europe in Munich, Europe's leading trade fair and conference for batteries and energy storage systems, takes place annually at the International Congress Center Messe München (ICM).

EES Electrical Energy Storage 2026 is set to be Europe's largest exhibition dedicated to batteries and energy storage systems. Taking place in Munich, Germany, the event spans from June 22 to June ...

TWAICE, a Munich-based battery software company, has secured EUR24 million in financing from the European Investment Bank (EIB) to scale up its predictive battery analytics for Europe's ...

The outskirts of Munich feature utility-scale solar parks with multi-megawatt battery storage systems. These support SWM's renewable energy targets and stabilize the Bavarian grid.

Munich Electrification is dedicated to developing innovative battery management systems, advanced control and sensing components, and a robust software framework designed for clean ...

MEAG, the asset manager for Munich Re, has agreed to acquire a 130-MW/354-MWh battery energy storage system (BESS) project in North Rhine-Westphalia, Germany, from SMA ...

Renewables like wind and solar energy are intermittent by nature. To successfully transition to an increasing percentage of renewable energy, we need energy storage systems that provide the ...
