

National restrictions on solar power generation

At the federal level, there are several key policies, programs, and regulations that impact the development of solar PV and other renewable energy projects, influencing project procurement ...

Residents and local restrictions are delaying and blocking renewable energy projects in the United States at an accelerated rate, according to a study from Columbia University.

The continued growth of the distributed solar market has prompted electric utilities, regulators, and others to consider improvements to the interconnection processes. Below are ...

It is uncertain to what extent the existing trade restrictions and tariffs have affected the expansion of domestic solar PV manufacturing or the rate of solar PV deployment; a number of factors may be ...

For each state, we created an overview of current and past state law on the placement and regulation of wind and solar power, and a list of counties that currently have blocks.

Starting with the direct tax implications of HR 1, this strategy of energy subtraction has undermined solar and storage projects across the country. The Department of Energy has cancelled ...

Across America's power grid, there's a growing gap between what we need and what we'll allow. As the planet warms and climate disasters grow more costly, the U.S. has set a target to reach ...

Across America, local bans, moratoriums and construction impediments are blocking wind and solar energy with increasing levels of red tape. Here's what USA TODAY's analysis found.

WASHINGTON -- Today, U.S. Secretary of the Interior Doug Burgum signed a Secretary's Order to more efficiently manage our nation's energy resources by permitting projects ...

President Donald Trump said the U.S. will not approve wind or solar power projects. Trump has tightened federal permitting for renewables with Interior Secretary Doug Burgum now ...
