

The off-grid version consists of a Solarfold container which, in conjunction with a suitable additional storage container, is not connected to the public power grid and functions completely autonomously.

Our expertise in utility-scale solar power generation, custom folding containers, and advanced energy storage solutions ensures reliable performance for various applications.

Designed for off-grid farms, mobile laboratories, and small construction sites. The 10ft format with 40kWh storage offers stable green energy for medium-duty tools, lighting, and refrigeration in remote ...

The solarfold Container is an immaculately-detailed and sophisticated plug & play system for a wide range of applications. The mobile drive system consists of a flexible drive unit mounted on traverses ...

Solarfold allows you to generate electricity where it's needed, and where it pays to do so. The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of ...

We design a solar container that fits your needs and send you a personalized quote. After you approve the quote, we start building. We'll update you regularly throughout the process. Once ready, collect ...

Each package contains a different number of Solarfold containers and the appropriate battery capacity. These combinations are not only used to optimize personal consumption, but can also be particularly ...

We offer two types of solar containers that differ in design and power output. Besides our flagship, auto-foldable container, we also offer the manual version of this unit.

Discover our range of innovative solar panels on shipping container products engineered to meet your renewable energy needs with maximum efficiency and reliability.

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no ...
