

What happens to broken solar panels?

Broken solar panels are not left to be 'landfilled'. Instead, if you are a business or utility company seeking a disposal solution at scale, contact We Recycle Solar for more information about what happens to your broken solar panels. (480) 482-7050.

Can photovoltaic panels be recycled?

Say voltaic! Three Europe-based industrial experts develop recycling of photovoltaic panels that would otherwise end up in landfills. Solar energy plays a major role in the clean energy transition. At the heart of photovoltaic technology lies highly purified silicon, which turns sunlight into electricity.

Where can I find information on solar panel recycling?

Recorded EPA webinar on solar panel recycling. EPA Solar Panel Waste webpage. Department of Energy Web Page on End-of-Life Management for Solar Photovoltaics. Information from the National Renewable Energy Laboratory (NREL) on solar panel reuse and recycling.

How do you recycle solar panels?

An ideal recycling system would recover as much material from solar panels as possible. There are different methods to recycle solar panels, which can include some or all of the following three steps: Separation and purification of the silicon cells and specialty metals (e.g., silver, tin, lead, copper) through chemical and electrical techniques.
