

Stay tuned for exciting updates as we continue to build Europe's leading arena for zero-emission mobility. Oslo - the world's EV capital - awaits you. See you May 6-7, 2026!

In 2023, Oslo stands out as the world's leading electric car capital, a title that might surprise many given Norway's relatively small size. Yet, this Nordic city boasts a remarkable statistic: ...

For more than 75 years Oslo-based car dealership Harald A M&#248;ller has been importing Volkswagens, but early in 2024 it bid farewell to fossil fuel cars. Now all the passenger vehicles for ...

Within five years, more than 30% of new cars sold in Oslo's urban area were electric vehicles or plug-in hybrids, and Oslo was named as "Europe's best electric car city" during an international EV conference.

For some of the wealthy Nordic country's major cities, about 30% of all passenger cars are now fully electric, according to Norway's EV Association. The EV adoption rate in the capital of...

Oslo is the capital city with the highest proportion of electric cars worldwide. What was previously little known: at public AC chargers, the capital's residents used to pay by the minute. Now, ...

Oslo Taxi's Tesla model Y (L) and the NIO ET5 electric vehicle from Nio Inc, a Chinese multinational electric car manufacturer, drive through the Norwegian capital Oslo, on September 27,...

How did Oslo become the world's electric vehicle capital? This video delves into the specific policies, incentives, and cultural factors that propelled Norway, and particularly Oslo, to the forefront of the EV ...

Oslo replaced its own municipal fleet with electric vehicles, showcasing their practicality and commitment to the cause. Seeing city officials navigate the streets in electric cars sent a ...

In 2025, 93 percent of all new cars sold in the Norwegian capital are fully electric. That remarkable figure is not just a statistical curiosity; it reflects a deliberate, long-term effort to reshape how people move ...
