

The Solar Power Manager is a high-efficiency module for IoT and renewable energy projects, offering MPPT function, multi-voltage outputs, and various protections.

Solar Energy Manager is a solar power management module, which can charge the 3.7V 18650 lithium battery through solar panel or USB port. The module features MPPT (Maximum Power Point ...

The Solar Power Manager (B) is compatible with general 6V~24V solar panels. It can recharge the 3.7V rechargeable Li-po battery through solar panel or USB TYPE-C connection, and provides 5V / 3A ...

Solar Power Manager is a complete small power and high-efficiency solar power management module. It features as MPPT (Maximum Power Point Tracking) function, maximizing the efficiency of the solar ...

The Solar Power Manager (B) is compatible with general 6V~24V ...

The Solar Power Manager is a module you want for your next project involving solar energy management. It is compatible with 6V to 24V solar panels and can easily charge a 3.7V ...

This solar power management module is designed for 6V~24V solar panel. It can charge the 3.7V rechargeable Li battery through solar panel or USB connection, and provides 5V/1A or 3.3V/1A ...

Small, efficient solar power module for 5V panels with MPPT, providing 900mA charging to 3.7V Li-ion batteries. Includes protection features and USB/solar options.
