

The Approval Guide contains real-time information about tens of thousands of products and services tested and FM Approved, as well as essential engineering data, technical information and use of ...

This generic international guideline for the certification of photovoltaic system components and complete grid-connected photovoltaic systems describes a set of recommended methods and ...

Approval Standard 4476, Approval Standard for Flexible Photovoltaic Modules, and Approval Standard 4478, Approval Standard for Rigid Photovoltaic Modules, enable PV module manufacturers and others ...

The photovoltaic bracket certification process acts as that crucial quality checkpoint for solar mounting systems. As solar installations multiply faster than mushrooms after rain, third-party validation ...

Photovoltaic brackets must comply with national civil and commercial building standards and specifications, special industry building standards and specifications, and ...

The FM Approvals certification mark is to verify that products and services meet their stated conditions of performance, safety, and quality. FM4478 is a standard that states the approval requirements for ...

FM Approvals has partnered with TÜV Rheinland, a world leader in solar and PV testing, to provide the electrical safety and performance certification required by the new Approval Standards.

We test and certify PV racking and tracking systems--full or component certification--to comply with national and international standards, including ANSI/UL, CAN/CSA, and IEC.

Learn about FM Approvals--certifying products and services that meet rigorous property loss prevention standards to support resilient businesses.
