

The USPVDB Viewer lets you discover, visualize, and interact with the USPVDB through a dynamic web mapping application.

The database contains both geospatial polygons encircling the installed equipment such as panels and inverters. The polygons were hand-drawn using high resolution aerial imagery.

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

The proposed PV-GPT system exemplifies how prompt-guided code generation coupled with semantic reasoning can be orchestrated into a reusable and extensible agent architecture, ...

Open PV Project: This dataset provides information on the installed photovoltaic (PV) systems in the United States. It includes data on the size, location, and cost of the installations, as well as ...

Lawrence Berkeley National Laboratory (Berkeley Lab) estimates hourly project-level generation data for utility-scale solar projects and hourly county-level...

It includes corresponding PV facility information, including panel type, site type, and initial year of operation.

Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. View an interactive map or download ...

Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential. Learn more, get an estimate and connect with providers.

Enter a state, county, city, or zip code to see a solar estimate for the area, based on the amount of usable sunlight and roof space.
