

Silicon Box's proprietary technology is able to support chiplet integration by addressing challenges in performance, scalability and costs in wafer-level and traditional packaging schemes.

The ePAK eFOSB (Front Opening Shipping Box) enhances 300mm wafer handling and shipping for semiconductor manufacturing. Compliant with SEMI/FIMS and AMHS standards, this FOSB ensures ...

The present invention relates to silicon wafer container manufacturing technology field, be specifically related to a kind of silicon chip of solar cell transportation packaging box.

Provides reliable and high purity protection with low inorganics and low particle generation for 200 mm wafer substrate shipping and storage applications.

Explore Malaster's industry-leading Silicon Wafer Packaging Systems, ranging from 3" to 12". Discover our precision-crafted protection for your wafers and our bespoke solutions tailored to your unique ...

Discover silicon wafer boxes in 4-8 inch sizes, made from recyclable PP with anti-static, stackable design. Ideal for safe transport and storage.

The rapid proliferation of photovoltaic (PV) modules globally has led to a significant increase in solar waste production, projected to reach 60-78 million tonnes by 2050. ...

A silicon wafer box, often referred to as a FOUP (Front Opening Unified Pod) or cassette, is a specialized container designed to hold and protect silicon wafers from environmental ...

Keep your semiconductor wafers in top condition when storing and transporting them with our Silicon Wafer Container. Ideal for displaying, carrying, and storing samples, it meets the specialized needs ...
