

The U.S. Department of Energy's Solar Energy Technologies Office (SETO) aims to accelerate the advancement and deployment of solar technology in support of an equitable transition to a ...

Based on a typical photovoltaic support failure case, this study involved detailed research on the design load and joint connection measures of photovoltaic supports.

The distributed PV settlement process involves calculating and disbursing payments for electricity fed into the grid and subsidies based on generation and consumption data. In our region, the ...

The trade defense case concerned photovoltaic (PV) cells and panels used to produce renewable energy, which is a core element of the European strategy to fight climate change.

This paper aims to offer innovative ideas and methods to address the challenges of PV bracket pile foundations in desert gravel areas through the design of this new type of PV bracket pile...

This paper contributes to the current issues and challenges faced by the support structure designer for the ground-mounted solar PV module mounting structure (MMS).

To enhance the economic efficiency and operational effectiveness of integrated photovoltaic-storage-charging stations, this paper proposes a metering and settle

Achieving a green, low-carbon economy necessitates clarifying the impacts of government photovoltaic (PV) subsidies on enterprise independent innovation in China. This study ...

A Settlement has been reached in a class action lawsuit against BP Solar and Home Depot involving solar panels manufactured between 1999 and 2007 with an S-type junction box ("Class Panels").

In order to respond to the national goal of "carbon neutralization" and make more rational and effective use of photovoltaic resources, combined with the actual photovoltaic substation project,...
