

At MODS, we design and fabricate high-performance generator and power units built from shipping containers. Our solutions provide reliable energy generation and storage for industries, construction ...

Containerised power generator sets offer a quick and straightforward deployment process. Once transported to the desired location, these sets can be easily installed, connected to ...

We've had conversations with customers about using container-based charging stations for their fleets of electric vehicles, and we think this particular container solution will become more ...

Whether you need a standard solution or a fully customized power module, we deliver packaging that ensures your power system operates safely, efficiently, and on schedule.

Learn best practices for integrating electrical and power systems into modified containers, including safety standards, load planning, ventilation, and compliance.

Convert shipping containers into mobile power stations equipped with generators or solar panels. These can be deployed to remote areas or disaster-stricken regions to provide temporary power solutions. ...

Explore innovative shipping container energy storage systems for sustainable, off-grid power solutions. Harness renewable energy storage effectively.

Designed with flexibility, scalability, and technological sophistication, the LunaVault is a model of efficiency for residential, industrial, and critical infrastructure applications.

Interport's shipping containers can be fully customized with a wide variety of modification options, depending on your power generation source and battery storage needs.

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power station using solar panels.
