

Featuring modular LiFePO₄ technology, intelligent BMS, and flexible configurations (20.48kWh-51.2kWh), this high-voltage battery system delivers safety, reliability, and scalability for ...

Our Rack-Mount lithium battery is built with top-tier Grade A cells, ensuring an extended cycle life and consistent performance. Equipped with an advanced Battery Management System (BMS), it elevates ...

Our High Voltage ESS Racks are designed for large-scale energy storage applications, offering a flexible, modular solution for a wide range of industries, including commercial, industrial, and ...

The HP-SG system is engineered for projects that require high energy density and long-term stability without sacrificing safety. Each battery module uses Solarvance's self-produced 100 Ah LFP ...

Namkoo server rack battery offers 6,000 cycles, 15+ year lifespan, and scalable 48V lithium storage from 24kWh to 48kWh+. Easy plug-and-play setup.

Engineered primarily for solar energy storage applications, our modular rack battery systems are designed to meet the diverse energy demands scaling from residential to commercial and industrial ...

This is a high-voltage, rack-mounted industrial energy storage system designed for modern factories and industrial park facilities. Inside the battery rack, we integrate structure, electrical components, and ...

It uses LiFePO₄ (Lithium Iron Phosphate) cells, ensuring high safety, long cycle life, and modular scalability. With a standard rack-mounted design, it allows for easy installation, maintenance, and ...

Available in both rack-mounted and stackable (modular) configurations, these high voltage lithium battery systems are designed for flexible deployment in residential, apartment, villa, and small ...

Power your energy storage needs with Eitai Solar's high voltage rack-mounted batteries. Ideal for commercial and utility-scale applications, our HV series delivers optimal performance.
