

Is Reykjavik a green world city?

As cities try to reduce their carbon footprint worldwide, Reykjavik continues to set a leading example for what it means to be a green world city- particularly with regard to renewable energy. Green City Times has identified several of the sustainability solutions implemented by the city of Reykjavik, Iceland.

How can Reykjavik achieve a green future?

The plan includes several measures to achieve the target, with promises to mandate the green emphasis in all of the city's operations. For example, one goal is to ensure all vehicles in the City of Reykjavik are powered by green energy by 2040, including both public and private transportation.

What type of energy does Reykjavik use?

Hydropower is prominent in Reykjavik's energy mix (mostly sourced from hydroelectric dams built on glacial rivers), and the rest of Reykjavik's electricity is sourced from geothermal power plants. - Most of the renewable energy for heating buildings produced in Reykjavik is geothermal energy.

Is Reykjavik a sustainable city?

The City of Reykjavik has developed a Municipal Plan for sustainable development to 2030. The Reykjavik Municipal Plan 2010-2030 includes a Sustainable Planning Policy, a plan to maintain Reykjavik as an internationally leading green city, details for the Planning of City Districts, a Neighborhood Plan, and an Environmental Impact Assessment.
