

The Oradea solar power plant was developed in partnership with Israeli financial services firm Phoenix Holdings, which has invested more than EUR 225 million in Econergy's Romanian and Polish projects.

By technology, solar photovoltaic accounted for 100.00% of the Romania solar energy market share in 2025. By grid type, on-grid systems dominated the Romanian solar energy market with a 95.10% ...

CWP Europe has commissioned a 174-MWdc solar farm in Romania, using bifacial modules on single-axis trackers with string inverters to extend shoulder-hour output and simplify maintenance.

Southeast Europe-focused renewables developer CWP Europe announced the commissioning of a 174-MWdc solar farm in Romania, saying the next step would be to add battery energy storage system ...

Romania has officially surpassed 5 GW of installed solar capacity, with growth evenly split between prosumers and utility-scale projects. In the last year alone, a record 1.7 GW was added--clear evidence of rising public ...

Romania's prosumer solar market continued its rapid growth toward the end of 2025, with nearly 290,000 registered prosumers and installed capacity surpassing 3.3 GW, according to the national energy ...

CWP Europe has commissioned the 174MWdc Studina solar project in Romania after the facility reached its commercial operation date. The company said the plant is expected to generate around ...

Discover the top solar energy companies in Romania for 2025. Our updated ranking includes global leaders, local innovators, and specialized providers driving Romania's renewable energy transition with cutting-edge ...

Romania is on track for record solar deployment in 2025, driven by subsidies for residential and commercial and industrial systems and a more favorable framework for utility-scale development.
