

Senegal has officially inaugurated the "Walo Storage" plant in Bokhol (Saint-Louis Region) on January 22, 2026. This marks a technological milestone as West Africa's first large-scale ...

Combining photovoltaic solar with a storage system is a unique solution to meet the current and future needs of the grid. In order to complement and intensify our local impact, Walo Storage is committed ...

Summary: Senegal's industrial sector is embracing energy storage solutions to combat power shortages and support renewable integration. This article explores market drivers, real-world applications, and ...

Energy storage solutions, particularly battery storage and pumped hydro storage, are emerging as critical components in this transition. This analysis delves into the potential, advantages,...

This statement underscores the importance of Walo Storage in Senegal's energy landscape and highlights the company's commitment to contributing to a more sustainable energy ...

That's the promise of advanced battery energy storage systems (BESS) in Senegal. In this article, we'll explore how smart energy storage solutions are transforming West Africa's renewable energy ...

Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery storage, the first of its kind in West Africa, as the country ...

The national electric utility of Senegal, Senelec, has signed a 20-year capacity change agreement (CCA) with developer Infinity Power for a 40MW/160MWh battery energy storage system ...

With the launch of Walo Storage, Senegal's energy sector enters a new era of sustainable solar power and reliability.

"I would like to thank our partners in Senegal, especially Senelec, for their unwavering support since our first investments in 2015. The on-time commissioning of Walo Storage ...
