

Slovenia selected a range of PV, battery storage and grid projects eligible for support via the European Union's Modernisation Fund.

This effort complements Slovenia's renewable energy expansion targets of 1,400 MW of solar and 70 MW of wind capacity, increasing grid flexibility and energy security. The strategy ...

NGEN installed a 12.6MW / 22MWh battery project in north-western Slovenia last year and held an official launch event in October 2019. Company press representative Mirjam Bernard told Energy ...

Conclusion GSL ENERGY's 480kWh BESS project in Slovenia showcases how renewable energy solutions can deliver tangible value to businesses. By prioritizing efficiency, ...

The Slovenian state-owned power company, Holding Slovenske elektrarne (HSE), will build two additional solar plants with battery storage in Prapretno.

The Slovenian energy solutions company Ngen will connect a 20 MW battery facility to the Slovenian transmission grid by September and install an additional 80 MW by 2024, company director Roman ...

Slovenia's HSE signs a EUR100M deal for 80 MW of new solar power plants with integrated battery storage, advancing the nation's renewable energy goals for 2050.

Summary: Slovenia is rapidly adopting advanced energy storage systems to support renewable integration and grid stability. This article explores the latest technologies, market trends, and ...

HSE is targeting 800MW of flexibility assets across Slovenia by 2035, including pumped hydro energy storage and BESS technology.

That's exactly what Ljubljana's energy storage power initiative is achieving. Nestled in Slovenia's capital, this project combines cutting-edge battery tech with smart grid solutions to tackle ...
